

GigaWorks T20 Series II

2.0 Multimedia Speakers

Overview

Professionally Designed for Hi-fi Music Playback

The new GigaWorks T20 Series II propels audio enjoyment to a whole new level of acoustic fidelity - over its award-winning predecessor, the GigaWorks T20.

This two-way speaker design comes with BasXPort™ technology, delivering excellent full range audio with rich extended bass, eliminating the need for an actual subwoofer. The silk dome tweeter with woven glass fiber driver produces crystal clear highs with full-bodied midrange for an unrivalled acoustic experience.

A perfect complement to your lifestyle, the stylish GigaWorks T20 Series II is built to recreate realistic live music experience in your home, giving you rich, full audio like no other.

Design

Two-way Design

Ingeniously designed for enhanced bass without the need for a subwoofer, the tweeter and mid-range driver layout help deliver balanced and natural audio.

Glass Fiber Cone Driver

The high-performance driver delivers natural and accurate lower frequency response - ideal for music of any genre. It can also withstand high temperature and humidity levels without affecting its damping properties.

Cloth Dome Tweeter

Dedicated tweeter that gives you crystal clear highs, complete with wide-spatial imaging.

BasXPort Technology

The BasXPort is acoustically engineered to enhance the lower frequency range by efficiently channelling sound waves from the inner chamber to the soundstage. This allows the speaker to deliver a more pronounced mid-range for a warmer, natural playback.

Convenient Front Access to Key Functions

Get the bass, treble and volume you want with the easily manoeuvred controls. For private listening, simply plug in your headphones. The Auxiliary-In port also makes connecting to external devices, such as your Creative MP3 players, more convenient than ever.

Connectivity

Extend Your Entertainment Options

Use the dual RCA-to-stereo adapter and connect the speakers to your LCD TV, DVD player or gaming console and enjoy solid audio entertainment.
