Velbon Pole Pod II

Product Name: Velbon Pole Pod II - Modular Tripod, Monopod & Head Set
Stock Code: 2408
Barcode: 4907990372369
Outer Carton Qty: 12

Description:

Velbon's Pole Pod II is a multi-function modular kit consisting of three main components which can be used individually or all together: The Ultra mini-2 tripod is a table-top or macro tripod which has 2-section multi-angle legs, featuring Velbon's unique twist-lock mechanism for fast but sturdy setup. The RUP-V40R monopod is a 4-section professional monopod which extends to 1.69m and will easily accommodate a DSLR camera. The QHD-33Q ball and socket head is compact and lightweight, but still includes a quick-release platform and is very quick to use. By inverting the monopod and removing the foot and camera screw, it can be attached directly to the tripod legs and used as a unique 'Pole-Pod' with the ball & socket head fitted to the top. This makes an ideal travel option where a mini tripod and monopod are required, as well as a tall self-standing support.
