

MediaShare Wireless

Wireless Portable Streaming Device
for smartphones and tablets

MediaShare Wireless Streaming

Verbatim's new MediaShare Wireless Streaming Device, allows you to stream media to your tablet/smartphone from portable storage media, such as SD cards, USB drives or portable HDDs (media not included) via a secure, wireless connection, wherever you are! Even better, up to 5 users can access and share stored content – simultaneously!

For maximum mobility, the MediaShare Wireless has a built-in rechargeable battery, with an approximate battery life of up to 9 hours**. MediaShare Wireless allows you access to your media while charging, so your entertainment or productivity is uninterrupted.

Similar devices are limited by built-in storage capacities, or inability to upload and download information from your tablet/smartphone to your media storage but the Verbatim MediaShare Wireless allows for simultaneous upload, download and streaming! Also, because it utilizes removable media, you'll never run out of space.

Verbatim MediaShare Wireless is the solution for wireless media streaming for anyone on the go.

Verbatim 2 Year Limited Warranty

*** Figure based on single user of MediaShare Wireless with movie playback streamed via an SDXC card with video bit rate of 2Mbps or less and no USB connection made to the device.
